

The Future of Gutter Installation

Welcome beyond

The T-Rex® is a continuous fastening system for gutters. It mounts rain gutters solidly on houses, making them much sturdier and longer-lasting than those mounted with spikes and hangers spaced at intervals.

About the company

Innovation is ingrained in the DNA of Alu-Rex. Our company emerged from a commitment to developing products that not only solve problems but also elevate the distinctiveness of our customers. We take pride in unveiling a new revolutionary product that once more validates this commitment of continuing to shape the future of gutter installation.

More than 300 million linear feet of patented continuous hangers and guards have been sold across the world.

→ **Innovative Fastening System**
Utilizes patented Floating™ technology for suspending gutters.

→ **Integrity Maintenance and Extended Lifespan**
Avoids puncturing, preserving gutter conditions.
The only gutter you will ever need.

→ **Durability**
Resistant to heavy weights and adverse weather.

→ **Adaptability**
Accommodates shape changes in gutters.

Why should gutters move?

To prevent water from seeping into the house.

Like many types of building materials installed outdoors for an extended period of time, gutters are prone to thermal contraction and expansion, which can compromise their watertightness, including with:
